

# WINDOWS 7 MIGRATION

DESKTOP ASSESSMENT, DESIGN AND BUILD

APPLICATION MANAGEMENT

TRAINING AND COMMUNICATIONS

DESKTOP AND END USER MIGRATION

HELP DESK AND ONGOING SUPPORT

AT SOME POINT, YOU'LL NEED TO  
START YOUR WINDOWS 7 MIGRATION.  
TAKE A DEEP BREATH AND REPEAT AFTER US:

# YOU CAN DO THIS.

The **Desktop Assessment, Design and Build** phase of your Windows 7 deployment is not only the foundation for your entire Windows 7 migration, it provides the information you need to estimate your complete Windows 7 migration timeline and costs.

**Face it:** you'll be tasked with migrating to Windows 7 sometime soon. No matter how much of a handle you have on what's in store, there is a lot you can learn from folks who have done it. You can find lots of resources to step you through the process, but how will you avoid the "gotchas," like integrating multiple versions of Internet Explorer, effectively migrating user data, or working with legacy applications?

## What's in the Desktop Assessment, Design and Build phase?

- 1 Proof of Concept
- 2 Creation of a hardware-independent Beta Image
- 3 Zero-touch and Light-touch Data Migration
- 4 Zero-touch Deployment

LET EDEN HELP.

# SOLUTIONS OVERVIEW

## 1 Proof of Concept (POC)

### *Experience Windows 7 in your environment*

Eden's Proof of Concept is a comprehensive review of all technologies relevant to Windows 7 deployment and an evaluation of where you stand today versus where you want to be in the new Windows 7 environment—with a focus on delivering a clear plan to get there.

Our POC is designed to let you test drive a Windows 7 environment, while providing key staff with a basic Windows 7 structural and functional overview.

#### **Eden's Proof of Concept will:**

- Create a vision statement for your unique Windows 7 desktop
- Review options for desktop lockdown including user account control
- Define the applications that will comprise the core computing platform (MS Office Productivity Suite, Security Suite, browser type, business applications, etc.)
- Identify the core platform functionality issues and known compatibility with the Windows 7 operating system
- Review minimum hardware standards
- Review the new Windows 7 functionality for illumination or incorporation (64-bit support, BitLocker, Windows XP mode, Aero, etc.)
- Demonstrate a virtualized app

## 2 Hardware-independent Beta Image

### *Check, please.*

Eden's Beta Image services are designed to validate your Windows 7 desktop image in a safe and secure lab environment. We will observe the execution of the image, advise and ensure your end result is an image you can put before users with confidence.

Our Windows 7 image is truly hardware independent. No more management of dozens of images, just a single image that can drop to any hard drive regardless of machine type.

#### **Our Beta Image services will:**

- Test your Windows 7 image in a secure lab environment
- If you are an Altiris shop, we can bridge the Altiris gap, helping you integrate and fully leverage the investment you made for imaging, deployments, software management, application packaging and virtualization, asset management, etc.

## 3 Data Migration

### *Trusted, without the touch*

Your data is critical to your business. So is your employees' time. Eden's Light-touch or Zero-touch Data Migration helps you move confidently through all phases of data migration—design, extraction, cleansing, load, and verification—while helping free up human resources from tedious tasks, and limiting employee downtime. And because we have so many data migrations under our belt, we know where your data might be hiding—no more “gotchas” later in the migration process.

Eden's Zero-touch system maps data expertly from your old system to the new system, providing a design for data extraction and data loading that works for your unique needs.

#### **Eden provides:**

- Input file specification for loading data onto the target system, allowing for a pre-load 'data validation' step
- Customization of Eden's data migration scripts for your environment, along with recommendations on data migration protocol when needed
- Development and testing of user data migration scripts to ensure no data is lost on pilot machines as well as comprehensive data backup
- Verification of data migration results to ensure accurate translation
- Automated and manual data cleaning in migration to improve data quality, eliminate redundant or obsolete information, and match the requirements of the new system

## 4 Zero-touch Deployment

### *That's right. We said z-e-r-o.*

Allow us some basic math: Your organization has 500 machines. Deploying each machine in a standard, full-touch manner takes at least 15 minutes of “touch” from someone on your IT team. That comes out to 125 hours, or roughly 16 working days, or three weeks—from your team.

Eden's Zero-touch Deployment moves your Windows 7 image to hard drives without the use of on-site staff. With Zero-touch Deployment, an upgrade can be deployed to every user in a matter of minutes, not hours. Don't have the resources to manage the deployments? No problem—our Eden Experts can help.

Zero-touch Deployment can save your IT organization money and time, and allow you to be more responsive to user demands.

#### **Eden offers:**

- Complete hands-off deployment, with alternative process as needed
- An off-line deployment strategy for machines that never log into the network
- Drive backup to ensure no data is lost
- A quality assurance process to ensure machines are deployed properly

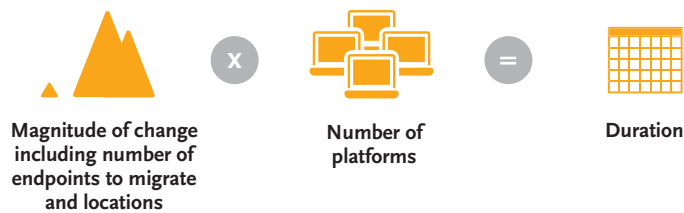

## Related Offerings

- Application Management**  
 Whether you need a little assistance or a lot, we offer flexible pricing for managing application assessment, packaging and distribution.
- Training and Communications**  
 Custom and fixed-price training and communications offerings that include documentation, emails, timelines, outlines and experienced learning professionals.
- Altiris Solutions**  
 A wide variety of Altiris offerings from a Master Specialized Symantec (Altiris) Partner.

## CAN'T THESE THINGS JUST GET ALONG?

### TIMELINE + COST

Eden's equation for estimating your particular design timeline combines a few factors:

Working together with your team, we can determine a realistic timeframe for your migration and show you how adjustments to the equation variables can shave time off your project plan.

**Eden strives to create flexible and adaptive options that allow you to purchase ONLY the services and support you need. Based on your budget and your migration timeline, we can provide:**

- Fixed price options
- Time and materials
- Or any combination

**Let's talk.**

“Zero-touch Windows 7 deployment has to be seen to be believed. Once you see it, you will want it.”

– *Andrew Sweeney, Partner, Eden Technologies*

# RELAX.

## YOU'RE ENTERING EDEN.

Imagine combining the security you have in choosing one of the monster IT consulting brand names (you know who they are) with the expertise, personality and high-touch customer service you dream of in your ideal IT partner. That's Eden. With Eden's flexible and adaptive Windows 7 offerings, you can feel you've made a secure business decision while still talking shop with some of the smartest, most helpful engineers around. At Eden, we're always in the game with you, offering:

- Local-based support
- A team with years of deployment experience—not collective experience, real experience—during the times you need it most.
- Expertise in planning/design
- Direct access to experts
- Responsive and friendly tech gurus who don't just talk tech, they talk to you.
